Important Safety Instructions

Safety Precautions
Do not attempt to install or operate your unit until you have read the safety precautions in this manual. Safety items throughout this manual are labeled with a Danger, Warning, or Caution based on the risk type.

Definitions
⚠ This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

⚠ DANGER
DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

⚠ WARNING
WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠ CAUTION
CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

➢ IMPORTANT
Indicates installation, operation, or maintenance information which is important but not hazard-related.

General Safety

⚠ WARNING
Please read all safety instructions before using your new refrigerator.

• Do not store or use gasoline or other flammable liquids near this or any other appliance. Read product labels for warnings regarding flammability and other hazards.
• Do not operate the refrigerator in the presence of explosive fumes.
• Avoid contact with any moving parts of the automatic ice maker.

• Remove all staples from the carton to avoid injury. Staples can also damage finishes if they come in contact with other appliances or furniture.

Child Safety

Packing Materials:
• Packing cartons covered with rugs, bedspreads, plastic sheets, or stretch wrap may become airtight chambers and can quickly cause suffocation.
• Destroy or recycle the product's carton, plastic bags, and any other exterior wrapping material immediately after the refrigerator is unpacked. Children should never play with these items.

Child Entrapment and Suffocation
• These problems are not limited to the past. Whether junked, abandoned, or temporarily stored (even for a few hours), unattended refrigerators and freezers are dangerous. Please take the precautions listed below.

Proper Disposal of Refrigerators/Freezers
We strongly encourage responsible appliance recycling/disposal methods. Check with your utility company or visit www.recyclemyoldfridge.com for more information on recycling your old refrigerator.

Before you recycle or dispose of your old refrigerator/freezer:
• Remove the doors.
• Leave the shelves and baskets in place so children may not easily climb inside.
• Have refrigerant and compressor oil removed by a qualified service technician.
The refrigerator must be plugged into its own dedicated 115 Volt, 60 Hz, AC-only non-GFCI electric outlet. The power cord of the appliance is equipped with a three-prong grounding plug for your protection against electrical shock hazards. It must be plugged directly into a properly grounded three-prong receptacle. The receptacle must be installed in accordance with local codes and ordinances. Consult a qualified electrician. Do not use an extension cord or adapter plug.

If the power cord is damaged, it should be replaced by the manufacturer, service technician, or a qualified person.

Never unplug the refrigerator by pulling on the power cord. Always grip the plug firmly and pull straight out from the receptacle to prevent damaging the power cord.

To avoid electrical shock, unplug the unit or switch the breaker that supplies power to the unit to the off position before cleaning and before replacing a light bulb or LED light.

Performance may be affected if the voltage varies by 10% or more. Operating the refrigerator with insufficient power can damage the compressor. Such damage is not covered under your warranty.

Do not plug the unit into an outlet controlled by a wall switch or pull cord to prevent the refrigerator from being turned off accidentally.
Understanding Features and Terms

Your Electrolux refrigerator is designed for optimal convenience and storage flexibility. The illustration below is provided to assist you with familiarizing yourself with product features and terminology.

**NOTE**

Features may vary according to model.
This Use & Care Guide provides general installation and operating instructions for your model. We recommend using a service or kitchen contracting professional to install your refrigerator. Use the refrigerator only as instructed in this Use & Care Guide. Before starting the refrigerator, follow these important first steps.

**Location**

- Choose a place that is near a grounded, non-GFCI, electrical outlet. Do Not use an extension cord or an adapter plug.
- If possible, place the refrigerator out of direct sunlight and away from the range, dishwasher, or other heat sources.
- The refrigerator must be installed on a floor that is level and strong enough to support a fully loaded refrigerator.

**Installation**

- Allow the following clearances for ease of installation, proper air circulation, and plumbing and electrical connections:
  - Sides 3/8" inch (9.5 mm)
  - Top and Back 1 inch (25.4 mm)
- Allow for trim kit if it to be installed with the unit.

**NOTE**

The refrigerator doors are designed to shut by themselves within a 20 degree opening.

**CAUTION**

DO NOT install the refrigerator where the temperature will drop below 40°F (13°C) or rise above 110°F (43°C). The compressor will not be able to maintain proper temperatures inside the refrigerator. DO NOT block the toe grille on the lower front of your refrigerator. Sufficient air circulation is essential for the proper operation of your refrigerator.

**NOTE**

If your refrigerator is placed with the door hinge against a wall, you may have to allow additional space so the door can be opened wider.
Door Handle Mounting Instructions

1. Remove handle from carton and any other protective packaging.

2. Position refrigerator handle end caps over upper and lower pre-installed shoulder bolts (A) that are fastened into door, ensuring the holes for the set screws are facing towards the outside of door if a single unit installation or the freezer door (if installing the matching freezer).

3. While holding handle firmly against door, fasten upper and lower Allen set screws (B) with supplied Allen wrench.

4. Repeat steps 2 and 3 to install freezer handle (if installing the matching freezer). Ensure the holes for the set screws are facing towards the refrigerator door.

NOTE

All set screws should be tightened and sub-flush (Allen set screw should be seated just below the surface of the end cap) of handle end cap. The end caps should be drawn tight to refrigerator door with no gaps.

Toe Grille Removal

To remove the toe grille, use a Phillips head screwdriver and remove the two screws holding the toe grille to the cabinet. Then pull the toe grille away from the unit.

Leveling

- The refrigerator must have all bottom corners resting firmly on a solid floor.
- The floor must be strong enough to support a fully loaded refrigerator.
- It is VERY IMPORTANT for your refrigerator to be level in order to function properly. If the refrigerator is not leveled during installation, the door may be misaligned and not close or seal properly, causing cooling, frost or moisture problems.

Leveling instructions continued on next page.
Leveling

To Level The Refrigerator:
While unit is lying on its back for wood skid removal, note the location of the four (4) leg levelers installed at each corner. These leg levelers will be used to level the refrigerator and to adjust the height. Use a carpenter’s level to level the refrigerator from front to back and side to side.

NOTE
Make sure to allow for the Trim and Leveling Kit if it is to be installed with the unit.

Leveling Instructions For Matching Tall Refrigerator / Tall Freezer Pair:
- Slide second unit into place leaving a minimum gap of 3/16” between units for door swing clearance.
- This last step may require at least one extraction of the second unit to properly align units in a “built-in” application.

Leveling Door with Adjustable Hinge
Use the lower hinge adjustment to fine tune the door height and for final cabinet spacing. Use a 7/16” socket or wrench to adjust the screw at the bottom of the lower hinge.

Adjusting Doors For Matching Tall Refrigerator / Tall Freezer Pair
The doors may also be adjusted side to side with the slotted hinge for aligning the doors parallel to each other. Loosen the two bolts with a 3/8” wrench and one screw with a Phillips screwdriver. Shift the doors until parallel, then retighten the screws securely. (See illustration below.)

Lower Hinge Adjustment For Leveling The Doors Of The Matching Tall Refrigerator / Tall Freezer Pair
To level the doors using the adjustable lower hinge (some models):
1. If the refrigerator door is lower than the freezer door, raise the refrigerator door by turning the adjustment screw clockwise using a 7/16 inch socket wrench. (See illustration below.)
2. If the freezer door is lower than the refrigerator door, raise the freezer door by turning the adjustment screw clockwise using a 7/16 inch socket wrench. (See illustration below.)

Leveling Instructions For Matching Tall Refrigerator / Tall Freezer Pair:
- Level door of first unit using all four levelers and slide unit into place. Recheck for levelness and adjust if necessary.
- Measure distance from floor to bottom of door on first unit. Adjust and level second unit so door height matches.
- Leg Level Adjustments:
  - One full turn of all four leg levelers will raise door 5/32”.

Door Removal and Temperature Control

Door Removal
If door must be removed:

⚠️ CAUTION

Doors are heavy. It is recommended to have two people to remove or replace the door assembly from the cabinet.

- Unplug the unit or switch the breaker that supplies power to the unit to the off position.
- Remove the plastic top hinge cover.
- Hold the door in place while removing the top hinge from the cabinet.
- Remove the two 3/8" hex head bolts from the top hinge with a 3/8" wrench or socket.
- Lift the door upwards and pull up and away from the cabinet until free of the bottom hinge pin mounted on the front of the cabinet.
- To replace the door, reverse the above procedures and securely tighten all screws to prevent hinge slippage.

Setting The IQ Touch™ Electronic Control

COOL DOWN PERIOD
For safe food storage, allow four (4) hours for refrigerator to cool down completely. The refrigerator will run continuously for the first several hours.

IQ TOUCH™ ELECTRONIC CONTROL
The IQ Touch™ Electronic Control is located inside the refrigerator. Temperature is factory preset to provide satisfactory food storage temperatures. However, the temperature control is adjustable to provide a range of temperatures for your personal satisfaction.

To adjust the temperature setting, press the UP (+) key for warmer temperature and DOWN (-) key for colder temperature on the control panel. Allow several hours for the temperature to stabilize between adjustments. The refrigerator can be adjusted between 33°F (1°C) and 46°F (8°C). By pressing the TEMP MODE key, the temperature display will toggle between °F to °C.

To turn the refrigerator OFF, press the UP (+) key until the warmest temperature setting of 46ºF (8ºC) shows in the display. Then press the UP (+) key three (3) times within three (3) seconds to turn the refrigerator OFF. The display will then scroll “OFF” across the display. To turn the unit back ON, press the DOWN key three (3) times within three (3) seconds. The control will then display “46ºF (8ºC)” and may be adjusted to the desired temperature.
IQ Touch™ Electronic Control Features

Replace Air Filter
When the “REPLACE AIR FILTER” LED is illuminated yellow, the air filter needs to be replaced. The control will signal for air filter replacement after 3600 hours of refrigerator operation. After replacing the air filter, reset the air filter timer by pressing the AIR FILTER key for 3 seconds. The “REPLACE AIR FILTER” LED will be illuminated green for three (3) seconds, confirming a timer reset.

Control Lock
To disable the keypads on the control, begin by pressing the CONTROL LOCK key for three seconds until “LO” is displayed for 1 second. With the control locked, when keys are pressed on the control panel, “LO” will be displayed. To unlock the control, press the CONTROL LOCK key for three seconds. The display will show “UL” for one second.

Power Fail
The POWER FAIL indicator light informs you that due to a power failure, the cabinet temperature exceeded 55°F (13°C). If the power failure lasted more than one (1) hour, the display alternates between showing the power failure duration (Hours and DURATION LED illuminate in the display) and the cabinet temperature (°F or °C illuminates) every ½ second. This safety feature will aid in determining what food spoilage action to take.

The Power Fail indicator light and duration display can be turned off by pressing the ALARM OFF key.
Alarms

There are four possible conditions that will cause the alarm tone to sound.

High Temp Alarm
If the temperature inside the cabinet has exceeded 55°F (13°C) for 1 hour or more of normal operation, the HI TEMP LED will illuminate, the HIGH TEMP Alert will sound and the cabinet temperature is shown in the display. The LED and temperature alarm will remain active until the cabinet temperature is below 55°F (13°C).

The audible alarm can be turned off by pressing ALARM OFF key.

Door Ajar Alarm
This alarm will sound to alert you that the door has been open for 5 minutes or more. The DOOR AJAR LED will illuminate and the audible alarm will sound until the door is closed.

The audible alarm can be turned off by pressing the ALARM OFF key or by closing the door. If the door is ajar for 15 minutes, the interior light will turn off.

Temp Sensing Error Alarm
The sensor alarm signals you that a problem exists with a temperature sensor. The audible alarm will sound after one (1) hour and the display will alternate between “E8” or “E9” and 33°F (1°C) at ½ second intervals.

The control will then enter a mode that runs the refrigerator in a manner that maintains the factory set cabinet temperature.

The audible alarm can be turned off by pressing the ALARM OFF key.

Stuck Key Alarm
The stuck key alarm will sound if the control reads a keypress for longer than 30 seconds. The audible alarm will sound and will be limited to one minute and will stop automatically. The display will alternate between “E7” and 33°F (1°C) at ½ second intervals. The control will then enter a mode that runs the refrigerator in a manner that maintains the factory set cabinet temperature until the condition is resolved.

The audible alarm can be turned off by pressing the ALARM OFF key.
Sabbath Mode

The Sabbath Mode is a feature that disables portions of the refrigerator and its controls in accordance with the observance of the weekly Sabbath and religious holidays within the Orthodox Jewish community.

To initiate or cancel Sabbath Mode, press the CONTROL LOCK and TEMP MODE keys at the same time and hold for three (3) seconds. The display will now show “Sb” and the confirmation tone will sound. When AC power is cycled while the control is in Sabbath mode, the control enters into Sabbath mode automatically. “Sb” will again be displayed. While in Sabbath Mode, the display will show “Sb” for one second if any key is pressed.

In the interest of food safety, only the HIGH TEMP Alarm remains active and takes precedence over other Sabbath Mode features.

For further assistance, guidelines for proper usage and a complete list of models with the Sabbath feature, please visit the web at http:\www.star-k.org.
Pure Advantage™ Air Filter

Your new Pure Advantage air filter is located inside one of the 2 Liter Door Bins. The air filter cover is located on the upper right side of the control box. In general, you should change the air filter with Part Number “EAFCBF” every six months to ensure optimal filtering of freezer odors. The replacement air filter can be purchased on the Electrolux website (http://www.electroluxappliances.com) or call toll free in the U.S. and Canada: 1-877-4ELECTROLUX (1-877-435-3287). Your electronic control is equipped with a Change Filter Indicator to remind you to change your filter. See page 10.

To Install Or Replace The Air Filter

- Pull down on the front of the Pure Advantage™ air filter cover. This releases the hinged bottom cover to drop open.
- Remove the old filter and discard it.
- Unpackage the new filter and place it inside the hinged bottom cover of the housing.
- Push the hinged bottom cover upward until the tab snaps into closed position.

Luxury Design™ Lighting

The interior cabinet lighting features LED lights that gradually ramp up in intensity after the door is opened.

To replace an LED:

**NOTE**

Unplug the unit or switch the breaker that supplies power to the unit to the off position before changing an LED light.

1. Unplug the electrical cord or switch OFF the power supply breaker.
2. Push down on the LED cover and then pull away from the cabinet interior.
3. From the inside of the LED cover, remove the wire harness connector by pressing on the latch with a small flat bladed screwdriver. Pull the wire harness connector out of the LED.
4. Replace with a new LED and install in the reverse order.
Storage Components

Storage

Luxury Design™ Glass Shelves
Multi-position adjustable slide out glass shelves can be moved to any position for larger or smaller packages. The shipping spacers that stabilize the shelves for shipping may be removed and discarded.

To Adjust The Shelves

- Lift front edge up.
- Pull shelf out.
- Replace the shelf by inserting the hooks at rear of the shelf into the wall bracket. Lower the shelf into the desired slots and lock into position.

Cool Zone™ Drawer
This model is equipped with a Cool Zone™ Drawer for storage of luncheon meats, spreads, cheeses, and other deli items.

Crisper Drawer With Adjustable Dividers
The crisper drawer, located at the bottom of the refrigerator interior, is designed for storing fruits, vegetables, and other fresh produce. Wash items in clean water and then remove excess water before placing them in the crisper. Items with strong odors or high moisture content should be wrapped before storing. Dividers may be adjusted for different size items within the crisper.

To remove the Crisper Drawer or Cool Zone™ Drawer:
1. Remove the glass cover from the drawer to be removed.
2. With both hands, lift up on the front of the drawer until it releases from the side supports.
3. Carefully remove the drawer from the refrigerator.

NOTE
Leafy vegetables keep best when stored with the humidity control set on HIGH HUMIDITY, or in a drawer without a humidity control. This keeps incoming air to a minimum and maintains maximum moisture content.
Adjustable Two Liter Door Bins
This model is equipped with adjustable door bins that can be moved to suit individual needs.

To Move Door Bins:
- Lift the bin straight up.
- Remove the bin.
- Place the bin in desired position.
- Lower the bin onto supports until locked in place.

Adjustable Dairy Bin
Use the dairy compartment, at the top of the fresh food compartment door, for short term storage of cheese, spreads, or butter. The dairy compartment is designed to be warmer than the open storage area to accommodate these types of food.

Full Width Gallon Bin And Perfect Bins™ Door Storage
The full width gallon bin is especially designed to hold gallon-sized containers like milk gallons. The door bins tilt out to provide convenient storage for cans and other items.

Condiment Shelf
The condiment shelf is designed to hold commonly used items such as mustards, jellies, seasonings and small jars.
Ideas For Storing Foods

Fresh Food Storage
- Keep the fresh food compartment between 34° F and 40° F with an optimum temperature of 37° F.
- Avoid overcrowding the refrigerator shelves, which reduces air circulation and causes uneven cooling.

Fruits and Vegetables
- Store fruits and vegetables in crisper drawers, where trapped moisture helps preserve food quality for longer time periods.

Meat
- Wrap raw meat and poultry securely so leakage and contamination of other foods or surfaces does not occur.

Energy Saving Ideas
- Locate the refrigerator in the coolest part of the room, out of direct sunlight, and away from heating ducts or registers. Do not place the refrigerator next to heat-producing appliances such as a range, oven, or dishwasher. If this is not possible, a section of cabinetry or an added layer of insulation between the two appliances will help the refrigerator operate more efficiently.
- Level refrigerator so that the door closes tightly.
- Refer to the “SETTING THE TEMPERATURE CONTROL” section for the suggested temperature control settings.
- Do not overcrowd the refrigerator or block cold air vents. Doing so causes the refrigerator to run longer and use more energy.
- Cover foods and wipe containers dry before placing them in the refrigerator. This cuts down on moisture build-up inside the unit.
- Organize the refrigerator to reduce door openings. Remove as many items as needed at one time and close the door as soon as possible.

Vacation And Moving Tips

Short Vacations:
- Leave the refrigerator operating during vacations of less than three weeks.

Long Vacations:
If the refrigerator will not be used for several months:
- Remove all food and unplug the power cord.
- Clean and dry the interior thoroughly.
- Leave the refrigerator door open slightly, blocking it open if necessary, to prevent odor and mold growth.

Moving: When moving the refrigerator, follow these guidelines to prevent damage:
- Disconnect the power cord plug from the wall outlet.
- Remove foods, then defrost, and clean the refrigerator.
- Secure all loose items such as base panel, baskets, and shelves by taping them securely in place to prevent damage.
- In the moving vehicle, secure refrigerator in an upright position to prevent movement. Also protect outside of refrigerator with a blanket, or similar item.

Care & Cleaning
Keep your refrigerator clean to prevent odor build-up. Wipe up any spills immediately and clean at least twice a year. Never use metallic scouring pads, brushes, abrasive cleaners or strong alkaline solutions on any surface. Do not wash any removable parts in a dishwasher. Always unplug the electrical power.

CAUTION
- When moving the refrigerator, pull straight out. Do not shift the refrigerator from side to side as this may tear or gouge the floor covering.
- Damp objects stick to cold metal surfaces. Do not touch interior metal surfaces with wet or damp hands.
CAUTION

- Turning the freezer temperature control to “OFF” (See Page 9) turns off the compressor, but does not disconnect electrical power to the LED lights or other electrical components. Unplug the unit or switch the breaker that supplies power to the unit to the off position.
- Do not use razor blades or other sharp instruments which can scratch the appliance surface when removing adhesive labels. Any glue left from tape or labels can be removed with a mixture of warm water and mild detergent, or, touch the glue residue with the sticky side of tape you have already removed. Do not remove the serial plate.

NOTE

- Do Not use abrasive cleaners such as window sprays, scouring cleansers, flammable fluids, cleaning waxes, concentrated detergents, bleaches, or cleansers containing petroleum products on plastic parts, interior doors, gaskets, or cabinet liners. Do not use paper towels, scouring pads or other abrasive materials.
- Never use metallic scouring pads, brushes, abrasive cleaners or strong alkaline solutions on any surface.
- Do not wash any removable parts in a dishwasher.
- Always unplug the electrical power.

Major Appliance Warranty Information

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will repair or replace any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used, and maintained in accordance with the provided instructions. In addition, the cabinet liner and sealed refrigeration system (compressor, condenser, evaporator, dryer or tubing) of your appliance is covered by a two through five year limited warranty. During the 2nd through 5th years from your original date of purchase, Electrolux will repair or replace any parts in the cabinet liner and sealed refrigeration system which prove to be defective in materials or workmanship when such appliance is installed, used, and maintained in accordance with the provided instructions.

Exclusions

This warranty does not cover the following:

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased "as-is" are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Pickup and delivery costs; your appliance is designed to be repaired in the home.
12. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
13. Damages to the finish of appliance or home incurred during transportation or installation, including but not limited to floors, cabinets, walls, etc.
14. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES

CUSTOMER’S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. ELECTROLUX SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES. SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

If You Need Service

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA, Puerto Rico and Canada. In the USA and Puerto Rico, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.

## Troubleshooting Guide

Before calling for service, review this list. It may save you time and expense. This list includes common occurrences that are not the result of defective workmanship or materials in this refrigerator.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
</table>
| Refrigerator does not run.             | * Refrigerator is plugged into a circuit that has a ground fault interrupt.  
                                           * Temperature control set to “OFF”.  
                                           * Refrigerator may not be plugged in, or plug may be loose.  
                                           * House fuse blown or tripped circuit breaker.  
                                           * Power outage. | * Use another circuit. If you are unsure about the outlet, have it checked by a certified technician.  
                                           * See “SETTING THE TEMPERATURE CONTROL” section.  
                                           * Ensure plug is tightly pushed into outlet. |
| Refrigerator runs too much or too long. | * Room or outside weather is hot.  
                                           * Refrigerator has recently been disconnected for a period of time.  
                                           * Large amount of warm or hot food have been stored recently.  
                                           * Door is opened too frequently or kept open too long.  
                                           * Door may be slightly open.  
                                           * Temperature control is set too low.  
                                           * Refrigerator gaskets are dirty, worn, cracked or poorly fitted. | * Room or outside weather is hot.  
                                           * Refrigerator has recently been disconnected for a period of time.  
                                           * Large amount of warm or hot food have been stored recently.  
                                           * Door is opened too frequently or kept open too long.  
                                           * Temperature control is set too low.  
                                           * Refrigerator gaskets are dirty, worn, cracked or poorly fitted. |
| Interior refrigerator temperature is too cold. | * Temperature control is set too low. | * Set control to a warmer setting. Allow several hours for the temperature to stabilize. |
| Interior refrigerator temperature is too warm. | * Temperature control is set too warm.  
                                           * Door is opened too frequently or kept open too long.  
                                           * Door may be slightly open.  
                                           * Large amount of warm or hot food have been stored recently.  
                                           * Refrigerator has recently been disconnected for a period of time. | * Set control to a colder setting. Allow several hours for the temperature to stabilize.  
                                           * Warm air entering the refrigerator causes it to run more. Open the door less often.  
                                           * See “DOOR PROBLEMS”.
                                           * Wait until the refrigerator has had a chance to reach its selected temperature.  
                                           * Refrigerator requires 24 hours to cool down completely. |
| “LO” is displayed on control.          | * Control has been locked. | * Press the CONTROL LOCK key for three seconds to unlock. |
| “E7”, “E8”, “E9” is displayed on control. | * The control has registered an error code. | * For toll-free telephone support in the U.S. and Canada: 1-877-4ELECTROLUX (1-877-435-3287) |
| “Sb” is displayed on control.          | * The control is in Sabbath Mode. | * Pressing the CONTROL LOCK and TEMP MODE keys to exit Sabbath Mode. |

## Sound And Noise

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Louder sound levels whenever refrigerator is on.</td>
<td>* Modern refrigerators have increased storage capacity and more stable temperatures. They require heavy duty compressors.</td>
<td>This is normal. When the surrounding noise level is low, you might hear the compressor running while it cools the interior.</td>
</tr>
<tr>
<td>Louder sound levels when compressor comes on.</td>
<td>* Refrigerator operates at higher pressures during the start of the ON cycle.</td>
<td>This is normal. Sound will level off or disappear as refrigerator continues to run.</td>
</tr>
<tr>
<td>Popping or cracking sound when compressor comes on.</td>
<td>* Metal parts undergo expansion and contraction, as in hot water pipes.</td>
<td>This is normal. Sound will level off or disappear as refrigerator continues to run.</td>
</tr>
</tbody>
</table>
### Sound And Noise (Continued)

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bubbling or gurgling sound.</td>
<td>* Refrigerant (used to cool refrigerator is circulating throughout the system.</td>
<td>* This is normal.</td>
</tr>
<tr>
<td>Vibrating or rattling noise.</td>
<td>* Refrigerator is not level. It rocks on the floor when it is moved slightly.</td>
<td>* Level the refrigerator. Refer to “LEVELING” in the “FIRST STEPS” section.</td>
</tr>
<tr>
<td></td>
<td>* Floor is uneven or weak.</td>
<td>* Ensure floor can adequately support refrigerator. Level the refrigerator by putting wood or metal shims under part of the refrigerator.</td>
</tr>
<tr>
<td></td>
<td>* Refrigerator is touching the wall.</td>
<td>* Re-level refrigerator or move refrigerator slightly. Refer to “LEVELING” in the “FIRST STEPS” section.</td>
</tr>
</tbody>
</table>

### Water / Moisture / Frost Inside Refrigerator

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moisture forms on inside refrigerator walls.</td>
<td>* Weather is hot and humid, which increases internal rate of frost buildup.</td>
<td>* This is normal.</td>
</tr>
<tr>
<td></td>
<td>* Door is slightly open.</td>
<td>* See “DOOR PROBLEMS”.</td>
</tr>
<tr>
<td></td>
<td>* Door is kept open too long or is opened too frequently.</td>
<td>* Open the door less often.</td>
</tr>
</tbody>
</table>

### Odor In Refrigerator

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Odors in refrigerator.</td>
<td>* Interior needs to be cleaned.</td>
<td>* Clean interior with sponge, warm water, and baking soda. Replace air filter.</td>
</tr>
<tr>
<td></td>
<td>* Foods with strong odors are in the refrigerator.</td>
<td>* Cover the food tightly.</td>
</tr>
</tbody>
</table>

### Door Problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Door will not close.</td>
<td>* Refrigerator is not level. It rocks on the floor when it is moved slightly.</td>
<td>* This condition can force the cabinet out of square and misalign the door. Refer to “LEVELING” in the “FIRST STEPS” section.</td>
</tr>
<tr>
<td></td>
<td>* Floor is uneven or weak.</td>
<td>* Ensure floor can adequately support refrigerator. Level the refrigerator by putting wood or metal shims under part of the refrigerator.</td>
</tr>
</tbody>
</table>

### Lighting Problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Light bulb is not on.</td>
<td>* The LED or light bulb is burned out.</td>
<td>* Follow directions under “LED LIGHTING” in the “REFRIGERATOR FEATURES” section.</td>
</tr>
<tr>
<td></td>
<td>* No electric current is reaching the refrigerator.</td>
<td>* See “REFRIGERATOR DOES NOT RUN”.</td>
</tr>
<tr>
<td></td>
<td>* Control is in Sabbath mode (Sb is displayed on control)</td>
<td>* Depress TEMP MODE key and CONTROL LOCK key for 3 seconds.</td>
</tr>
</tbody>
</table>

### Installation Checklist

#### Doors
- Handles are secure and tight
- Door seals completely to cabinet on all sides
- Freezer door is level across the top

#### Leveling
- Refrigerator is level, side-to-side and front-to-back
- Toe grille is properly attached to refrigerator
- Cabinet is setting solid on all corners

#### Electrical Power
- House power turned on
- Refrigerator plugged in

#### Air Filter
- Air Filter is installed

#### Final Checks
- Shipping material removed
- Fresh food temperatures set
- Crisper humidity controls set
- Registration card sent in
