Important Safety Instructions

Recognize safety symbols, words and labels
Safety items throughout this manual are labeled with a WARNING or CAUTION based on the risk type as described below:

Definitions
⚠️ This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

⚠️ WARNING
WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ CAUTION
CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

⚠️ IMPORTANT
IMPORTANT indicates installation, operation or maintenance information which is important but not hazard-related.

Product Record

Record Your Model and Serial Numbers
The model and serial numbers of your dryer are found on the serial plate located inside the door opening. Record and retain these numbers.

Model Number ____________________________

Serial Number ____________________________

Purchase Date ____________________________

Read all instructions before using this appliance. This book contains valuable information about:
- Operation
- Care
- Service
Keep it in a safe place.

This Use and Care Guide provides general operating instructions for your dryer. It also contains information about features for several other models. Your dryer may not have every feature included.
Use the dryer only as instructed in this Use & Care Guide.

NOTE
The instructions appearing in this Use and Care Guide are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating and maintaining any appliance.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.
Important Safety Instructions

Avoid fire hazard or electrical shock. Do not use an adaptor plug or extension cord or remove grounding prong from electrical power cord. Failure to follow this warning can cause serious injury, fire or death.

**208-240 v Electric Dryer**

10-30R 3-wire (fused 30 amp)

14-30R 4-wire (fused 30 amp)

Avoid fire hazard or electrical shock. Do not use an adaptor plug or extension cord or remove grounding prong from electrical power cord. Failure to follow this warning can cause serious injury, fire or death.

**WARNING - RISK OF FIRE**

To reduce the risk of fire, electrical shock, or injury to persons when using this dryer, comply with the basic warnings listed below. Failure to comply with these warnings could result in serious personal injuries. You can be killed or seriously injured if you don’t follow these Important Safety Instructions:

**PREVENT FIRE**

- Do not dry items that have been previously cleaned in, soaked in, or spotted with gasoline, cleaning solvents, kerosene, waxes, etc. Do not store these items on or near the dryer. These substances give off vapors that could ignite or explode.

- Do not place items exposed to cooking oils in your dryer. Items contaminated with cooking oils may contribute to a chemical reaction that could cause a load to catch fire.

- Do not dry articles containing rubber, plastic or similar materials such as bras, galoshes, bath mats, rugs, bibs, baby pants, plastic bags and pillows that may melt or burn. Some rubber materials, when heated, can under certain circumstances produce fire by spontaneous combustion.

- Do not use heat to dry items containing feathers or down, foam rubber, plastics similarly textured, rubber-like materials.

- Clean the lint screen before or after each load. The interior of the dryer, and lint screen housing should be cleaned approximately every 18 months by qualified service personnel. An excessive amount of lint build-up in these areas could result in inefficient drying and possible fire. See Care and Cleaning.

- Do not operate the dryer if the lint screen is blocked, damaged or missing. Fire hazard, overheating and damage to fabrics can occur.

- Do not obstruct the flow of ventilating air. Do not stack or place laundry or throw rugs against the front or back of the dryer.

- Do not spray any type of aerosol into, on or near dryer at any time.

- Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product.

- Do not continue to use the dryer if you hear squeaking, grinding, rubbing or other unusual noises. This could be a sign of mechanical breakdown and lead to fire or serious injury. Contact a qualified technician immediately.

- Failure to comply with these warnings could result in fire, explosion, serious bodily injury and/or damage to the rubber or plastic parts of the dryer.
PROTECT CHILDREN
- Do not allow children to play on or in the dryer. Close supervision of children is necessary when the dryer is used near children. As children grow, teach them the proper, safe use of all appliances.
- Destroy the carton, plastic bag and other packing materials after the dryer is unpacked. Children might use them for play. Cartons covered with rugs, bedspreads or plastic sheets can become airtight chambers.
- Keep laundry products out of children’s reach. To prevent personal injury, observe all warnings on product labels.
- Before the dryer is removed from service or discarded, remove the dryer door to prevent accidental entrapment.
- Failure to comply with these warnings could result in serious personal injuries.

PREVENT INJURY
- To prevent shock hazard and assure stability during operation, the dryer must be installed and electrically grounded by a qualified service person in accordance with local codes. Installation instructions are packed in the dryer for the installer’s reference. Refer to INSTALLATION INSTRUCTIONS for detailed grounding procedures. If the dryer is moved to a new location, have it checked and reinstalled by a qualified service person.
- ALWAYS disconnect the dryer from the electrical supply before attempting any service or cleaning. Failure to do so can result in electrical shock or injury.
- Do not use any type spray cleanser when cleaning dryer interior. Hazardous fumes or electrical shock could occur.
- To prevent injury, do not reach into the dryer if the drum is moving. Wait until the dryer has stopped completely before reaching into the drum.

PREVENT INJURY AND DAMAGE TO THE DRYER
- All repairs and servicing must be performed by an authorized servicer unless specifically recommended in this Owner’s Guide. Use only authorized factory parts.
- Do not tamper with controls.
- Do not sit on, step on or stand on the dryer. Do not rest heavy loads on top. The dryer is not meant to support weight.
- Do not install or store the dryer where it will be exposed to the weather.
- Failure to comply with these warnings could result in serious personal injuries.

⚠️ CAUTION
The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the state to cause cancer, birth defects or other reproductive harm, and requires businesses to warn customer of potential exposure to such substances. Included in this list are soot and carbon monoxide, both of which may be produced by the use of this product.
*Not all models come with drying rack and stacking kit from the factory. They may be purchased as accessories.
Normal Operating Sounds

You may or may not hear the following sounds from your new dryer:

A. SUSPENSION ROLLERS The dryer drum is supported by a set of suspension rollers. At times there may be a thumping or rolling sound when the dryer starts. This may happen if the dryer has not been in use for a period of time, or after a heavy load has remained in the dryer drum for an extended period, creating a temporary flat spot on the edge of the roller. The noise should dissipate as the dryer operates and the flat spots smooth out.

B. AIR FLOW SYSTEM Your dryer is equipped with a high volume air handling system. In some installations there may be some sounds associated with air movement throughout the dryer. This is normal and can vary with load size and type.

⚠️ CAUTION

Do not continue to use the dryer if you hear squeaking, grinding, rubbing or other unusual noises. This could be a sign of mechanical breakdown and lead to fire or serious injury. Contact a qualified technician immediately.

⚠️ IMPORTANT

If installed in a closet the dryer will not function correctly with the door in the closed position. This condensation process requires access to cool air from the room. The unit must only be operated with the door in the open position to allow correct air circulation.
Operating Your Dryer

**WARNING**

To reduce the risk of fire, electric shock or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS in this Use and Care Guide before operating your dryer.

1 Prepare load for drying.
   - Dry items of similar fabric, weight and construction in the same load.
   - Separate dark items from light-colored items. Separate items that shed lint from those that attract lint.
   - Check for stains which may not have been removed in washing. Repeat stain removal process and wash again before drying. Drying may permanently set some stains.
   - Place delicate or small items in a mesh bag.

   ![Mesh bag not included.](image)

   - Be sure buckles, buttons and trim are heatproof and won’t damage the drum finish. Close zippers; fasten hooks and Velcro®-like fasteners. Tie strings and sashes to prevent snagging and tangling.

2 Check that the lint filter is clean and in place and water container is empty. See also Care and Cleaning section.

3 Load the dryer and close the door.
   - Load items loosely. The average wet load will fill the drum 1/3 to 1/2 full. Items need room to tumble freely for even drying and less wrinkling.
   - Fabric softener sheets are not recommended with this condensing dryer.
   - To save energy and time and avoid uneven drying and wrinkling, do not overload the dryer.
   - When drying large items, dry only two or three items at a time. Fill out the load with small and medium sized items.
   - For delicate or very small loads, add two or three similar items to improve tumbling action.

   ![Mesh bag not included.](image)

   ![Lint filter and water container](image)

   - **CAUTION**
     Do not operate dryer without lint filter in place.

4 Select the appropriate cycle and settings for each load.

   ![Cycle selection](image)

   - **NOTE**
     Over-drying can cause wrinkles, shrinkage, lint, harshness and a build up of static electricity.

     • Press the Power button to turn on the unit.
     • Select a desired cycle by pressing its icon.
     • The estimated cycle time, drying temperature, dryness level and options will be indicated for the cycle selected. See the “Dryer Settings Chart” for more details.
     • To change the settings, press the Temperature or dryness icons to scroll to the desired settings.
     • To select or delete an option, press the icon for that option. The indicator will be illuminated when the option has been selected. The indicator will no longer be lighted when the option has been deleted.

5 Start the dryer.
   - Close the door and press Start. The dryer will not operate with the door open. “Check the door” will be displayed as a reminder to close the door.
   - Select delay start to delay the beginning of the cycle, if desired.
   - To add a forgotten item to the dryer drum, press Pause and open the door. “PAUSE” will be displayed alternately with the estimated remaining cycle time. Opening the door with a cycle running will also pause the cycle. Add the item, close the door and press Start to resume the cycle.
   - If changes to the settings or options are attempted after the cycle starts, you will hear several beeps when the buttons are pressed. To change the settings or options, press Pause, make the new selections and press Start again.
   - To change the cycle once the cycle has begun, press the Power button to cancel the current cycle, press the Power button to turn on unit again, select a new cycle, and press Start again. Just pressing another cycle icon will not change the cycle.
   - To stop the cycle, press the Power button.
   - A signal will sound at the end of the cycle if the chime option has been selected.

   ![Cycle selection](image)

   - **NOTE**
     To provide the best care for your laundry, not every setting or option is available with every cycle. If a setting or option is not available for the cycle selected, the indicator will not light.

6 When the cycle ends, remove items immediately and hang or fold.

   ![Cycle setting](image)

   - **IMPORTANT**
     Clean the lint filter and empty the water container after every load.

   ![Lint filter and water container](image)

   - **NOTE**
     If drying a single large or bulky item remove the item part way through the cycle and turn it “inside out” to maximize drying effectiveness. Place item back in dryer and re-start cycle.

   ![Cycle setting](image)
Operating Instructions

Press the Power button to turn on the unit. Press the icon for the cycle desired and the indicator for that cycle will be illuminated.

To change the cycle once the cycle has begun, press the Power button to cancel the current cycle, press the Power button to turn on unit again, select a new cycle, and press Start again. Just pressing another cycle icon will not change the cycle.

Cycle Selection

Press the Power button to turn on the unit. Press the icon for the cycle desired and the indicator for that cycle will be illuminated.

To change the cycle once the cycle has begun, press the Power button to cancel the current cycle, press the Power button to turn on unit again, select a new cycle, and press Start again. Just pressing another cycle icon will not change the cycle.

Auto Dry Cycles

Auto Dry cycles take the guesswork out of selecting the correct drying time for each load. Moisture sensing bars in the front of the dryer drum sense the moisture level of the load as it tumbles through the heated air. With Auto Dry cycles, the load will automatically be dried at the selected temperature to the desired dryness level. Auto Dry cycles save time and energy and protect fabrics.

When the load has reached the selected dryness level, it will continue to tumble during a cool down period. This helps reduce wrinkling and makes items easier to handle during unloading.

Drying time varies depending on size and dampness of load and fabric type. If the load is too small or almost dry, the moisture sensing bars may not detect enough moisture to continue the cycle and the cycle may end after a few minutes. If this occurs, select a Timed Dry cycle.

Room temperature, and electrical voltage can also affect drying time.

For best results

Follow the fabric care label instructions on items to be dried.

normal
Select this Auto Dry cycle for cotton items.

heavy duty
Select this Auto Dry cycle to dry durable fabrics such as jeans and overalls.

delicates
Select this Auto Dry cycle for knits and delicate items.

casual
Select this Auto Dry cycle for cottons and blends with a no-iron finish.

mixed load
Select this Auto Dry cycle to dry loads containing a mix of fabrics.

touch up
Select touch up to help remove wrinkles from clean and dry items that were not taken from the dryer at the end of the cycle, have been stored in crowded closets or drawers, or unpacked from luggage following a trip. It provides approximately 10 minutes of low heat tumbling followed by a 25-minute cool down period.

towels
Select this cycle to dry heavy loads such as towels and non-rubber-backed bath mats.
**Specialty Cycle Selection**

To scroll through the specialty cycles, continue to press the **specialty cycles** icon. The selected cycle will be shown on the text display.

**jeans**
Select this Auto Dry cycle for drying an entire load of denim jeans.

**fast dry**
Quickly dry a small load.

**wool**
Use the wool cycle with washable woolens - check your fabric care label to ensure proper garment care. To help your wool items keep their shape, use of optional drying rack is recommended.

**time dry**
To manually select the drying time for this specialty cycle, press the **dry time** icon. Actual drying time (20 minutes to 120 minutes) will be displayed. Because this is not an Auto Dry cycle, you will not be able to select a dryness level. Moisture sensing bars are not active and dryer will continue to heat throughout the cycle until the final cool down period.

**Cycle Settings**

Appropriate temperature, dryness level and options will be displayed for each cycle. The settings can be changed before the cycle is started. If changes are attempted after the cycle starts a signal will beep and “Not possible” will be displayed.

**NOTE**
To change settings after the cycle starts, press **Pause**, adjust the setting and press **Start** to resume the cycle.

**Drying Temperature**

To change the preset temperature, press the **temperature** icon to scroll to the desired setting. To protect your fabrics, not all temperatures are available with every cycle. The indicator will not light if the setting is not available with that cycle.

- **max**
  Recommended for durable fabrics and towels.
- **medium**
  Recommended for most cotton fabrics.
- **low**
  Recommended for delicate fabrics.

**Dryness Level (Auto Dry)**

To change the preset level, press the **dryness** icon to scroll to the degree of dryness desired. To protect your fabrics, not all dryness levels are available with every cycle. If a dryness level is not appropriate for the cycle, it cannot be selected.

Select the **normal** dry level for most Auto Dry cycles. Occasionally a load may seem too damp or over-dried at the end of the cycle. To increase drying time for similar loads in the future, select **max**. For loads requiring less drying time, select **less**.

Select **damp** for items you wish to partially dry before hanging or ironing.

**Cycle Options**

To add options, press the corresponding option’s icon to illuminate the selection desired. To delete options, press the option’s icon again and the indicator light will turn off. If an option is not appropriate for the cycle, the indicator will not light. To protect your fabrics, not all options are available with every cycle. Not all options are available on every model.

**NOTE**
To change the options once the cycle has begun, press the **Pause** button, make the new selection and press **Start** again.

**wrinkle release**
Select **wrinkle release** if the dried load might not be removed promptly at the end of the cycle. The dry load will continue tumbling without heat to help reduce wrinkling. When **chime** is selected, a beep will be heard periodically. The load may be removed any time during **wrinkle release**.

**chime**
A signal will sound at the end of the cycle (and periodically during **wrinkle release**) if this option is selected.
Drying System Maintenance Procedures

**Water Container Full (if direct drain kit not installed)**
When the “Water Container Full” indicator comes on, follow these steps to empty the container:
1. Support the container as you pull it out.
2. Hold container level to prevent water from spilling.
3. Dump water container in sink or drain.
4. Return container fully before continuing operation of dryer.

**CAUTION**
Do not drink or prepare food with the condensed water from your dryer water. It can cause health problems to people and pets.

**Clean Condenser**
When the “Clean Condenser” indicator comes on, follow the Condenser Cleaning instructions in the Care and Cleaning section of this manual.

**Lint Filter Plugged**
When the “Lint Filter Plugged” indicator comes on, follow these steps to clean the filter:
1. Remove the filter by pulling straight up.
2. Release the latch on the filter grille to open the filter.
3. Remove trapped lint and larger particles by hand.
4. If necessary, clean filter screen with hot water.
5. Return filter before continuing use of the dryer.

**CAUTION**
Do not operate dryer without lint filter in place.
Other Features

My Favorites
After some time of initial usage, the dryer will automatically remember the 3 most used cycles with their settings and options. To cycle through this list continue to press the My Favorites button. Press Start after your desired cycle appears.

Delay Start
Press delay start to select a dry time convenient to your schedule or during off peak energy hours. The delay time selected will be displayed and begin counting down when you select Start.

Control Lock
To avoid having someone accidentally start or stop the dryer, press dry time and wrinkle release at the same time and hold until the indicator is lit. To unlock the controls, press dry time and wrinkle release at the same time and hold until the indicator is no longer lit.

Status Display/Status Lights
The estimated total cycle time will be displayed when the cycle is selected. The estimated remaining cycle time is displayed during the cycle.

Drum Light
The drum light will come on whenever the door is opened to illuminate the drum during loading and unloading. Closing the door turns off the light.

Reversible Door
Your dryer is equipped with a reversible door. The door can be hinged on the right or left side.

NOTE
For step-by-step instructions on DOOR REVERSAL, refer to the Installation Instructions supplied with this dryer.

Drying Rack (on select models)
Use the drying rack for items which should not be tumble dried. Insert the rack into the dryer drum and lower the front two "legs" into the openings on the lint filter grille.

Place items to be dried on top of the rack, leaving space between items and not allowing them to hang over the sides or through the holes. Select the low heat setting for items containing plastic, foam rubber, rubber-like materials, feathers or down. When items are dry, remove the rack and store it in a convenient location.

NOTE
If your model did not come supplied from the factory with a drying rack you may order one.

Care and Cleaning

• Before cleaning the dryer interior, unplug the electrical power cord to avoid electrical shock hazards.
• Do not use any type spray cleanser when cleaning the dryer interior. Hazardous fumes or electrical shock could occur.

INSIDE
• Clean the lint filter after every load. Lint build-up on the filter restricts air flow, which causes longer drying times. The filter is located at the bottom of the door opening. Remove by pulling straight up. Remove the lint and replace the filter.
• Occasionally a waxy build-up may form on the lint filter and/or moisture sensing bars from using dryer-added fabric softener sheets. To remove this build-up, wash them with warm, soapy water. Dry the filter thoroughly and replace. Do not operate the dryer without the lint filter in place.
• If the dryer drum becomes stained from noncolorfast fabrics, clean the drum with a damp cloth and a mild liquid household cleanser. Remove cleanser residue before drying the next load.
• See next page for more information regarding cleaning of the condenser assembly.

OUTSIDE
• Clean the cabinet with mild soap and water. Never use harsh, gritty or abrasive cleansers.
• Remove debris and lint from the front of the condenser door with a vacuum cleaner.
• Remove glue residue from tape or labels with a mixture of warm water and mild detergent. Or, touch residue with the sticky side of the tape or label.
• Before moving the dryer, place a strip of cardboard or thin fiberboard under the front leveling legs to prevent damage to the floor.

IMPORTANT
Clean the lint filter and dump water container after every load.

IMPORTANT
Do not store or place laundry products on top of dryer at any time. They can damage the finish or controls.

WARNING
To reduce risk of fire or serious injury to persons or property, comply with the basic warnings listed in the Important Safety Instructions and those listed below.

• Before cleaning the dryer interior, unplug the electrical power cord to avoid electrical shock hazards.
• Do not use any type spray cleanser when cleaning the dryer interior. Hazardous fumes or electrical shock could occur.

INSIDE
• Clean the lint filter after every load. Lint build-up on the filter restricts air flow, which causes longer drying times. The filter is located at the bottom of the door opening. Remove by pulling straight up. Remove the lint and replace the filter.
• Occasionally a waxy build-up may form on the lint filter and/or moisture sensing bars from using dryer-added fabric softener sheets. To remove this build-up, wash them with warm, soapy water. Dry the filter thoroughly and replace. Do not operate the dryer without the lint filter in place.
• If the dryer drum becomes stained from noncolorfast fabrics, clean the drum with a damp cloth and a mild liquid household cleanser. Remove cleanser residue before drying the next load.
• See next page for more information regarding cleaning of the condenser assembly.

OUTSIDE
• Clean the cabinet with mild soap and water. Never use harsh, gritty or abrasive cleansers.
• Remove debris and lint from the front of the condenser door with a vacuum cleaner.
• Remove glue residue from tape or labels with a mixture of warm water and mild detergent. Or, touch residue with the sticky side of the tape or label.
• Before moving the dryer, place a strip of cardboard or thin fiberboard under the front leveling legs to prevent damage to the floor.

IMPORTANT
Do not store or place laundry products on top of dryer at any time. They can damage the finish or controls.
Cleaning Condenser

Clean Condenser
When the “Clean Condenser” indicator comes on, follow these steps to remove and clean the condenser assembly:

1. Open the dryer door and locate the condenser access door latch release.

2. While pressing release, open the condenser access door.

3. Rotate the two latches to lower the condenser screen.

4. Grab the condenser handle and pull straight out.

5. Rinse condenser in sink. Clean with mild soap and water if necessary.

6. Push condenser back in place, close retention panel, rotate latches and close condenser access door until it latches.
## Common Drying Problems

Many drying problems involve poor soil and stain removal, residues of lint and scum, and fabric damage. For satisfactory washing results, follow these suggestions provided by The Soap and Detergent Association.

</tbody>
</table>

*Drum damage caused by foreign objects or permanently attached items is not covered by the warranty.
For the applicable warranty period as set forth below, as measured from your original date of purchase, Electrolux will repair or replace any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

**Warranty Periods:**
- All parts — One year including labor. In addition, your appliance is covered by a one year, parts only, limited warranty. During the 2nd year from your original date of purchase, Electrolux will pay for parts needed for this appliance that have proven to be defective in materials or workmanship when your appliance is installed, used, and maintained in accordance with the provided instructions.
- Wash tub — Functional life of the product (excluding labor)
- Wash tub drive motor, non-cosmetic defects — Ten years (excluding labor)

**Exclusions**
This warranty does not cover the following:
1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased “as-is” are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

**DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES**
CUSTOMER’S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. ELECTROLUX SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES, SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

**IF YOU NEED SERVICE**
Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
